

UI Design and Prototyping Report Template

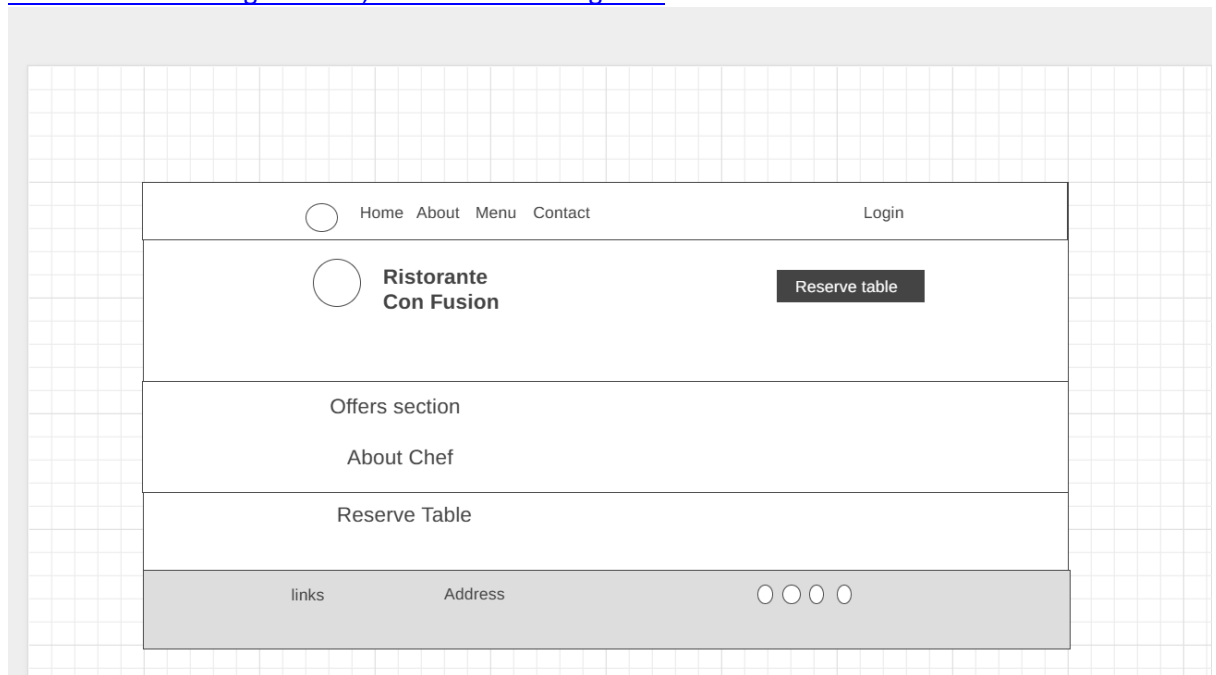

Ristorante Con Fusion

1. Introduction

- My Project is on a restaurant “Ristorante con Fusion”
- In home page there are some offers that are running in our restaurant at that time
- One can reserve their table in advance
- In the footer section there is the address and some social media links.
- About section basically highlights the history and speaks about our staffs in a nutshell.
- Contact us page basically contains our address and the location of the restaurant with a google map attached to it.
- In the last section of contact us page there is a form attached to it through which anybody can send any query to us.

2. User Interface Design and Prototype

- [Wireframe.cc – the go-to free, online wireframing tool.](https://wireframe.cc)

3. Navigation Structure

- In navigation bar we have Home About, Menu and Contact by clicking on the options we can navigate to the respective pages.
- First the user will log in to our website and come to the home page, from there he can reserve a table for himself,
- He can go to about section to get an idea about our restaurant.
- He can contact us from our contact page he can the log out.
